

Where the Seed Lands

Can you make a model of the 4 different places where the seed lands by finding examples in your garden, or taking photos on a walk. You will need to find an example of:

- A path
- Patches of rock
- Thorns
- Rich soil

Once you've got your examples you can look at them and talk about how our hearts can sometimes be like each of the different places where the seed landed.

Discuss:

The path

- What can stop us understanding the good news?
- What would help us to understand the good news more and help it to sink in?

Patches of rock

- Have you ever faced a difficult time/situation that has made you question your faith?
- What has helped to keep your faith strong?

Among thorns

- Do you have any "thorns" in your life that stop you from growing in faith?
- How do you try to get rid of these thorns?

Rich Soil

- What helps you to grow in your faith, like the rich soil helps the seeds grow?
